Chick Production DEPOSITORY

October 16, 1967

Hatcheries produced an estimated 234 million chicks during September 1967, a decrease of 5 percent from the 248 million produced in September 1966, according to the Crop Reporting Board. The number of broiler-type chicks hatched totaled 201 million, down 6 percent from a year earlier. During January through September 1967, there were 2,118 million broiler-type chicks produced, 1 percent above the same months last year. The number of broiler-type eggs in incubators on October 1, 1967 was down 8 percent from October 1, 1966.

The number of egg-type chicks hatched during September is estimated at 33.6 million, a decrease of 5 percent from September 1966. All regions recorded decreases from a year earlier except the West North Central and West which were about the same. The decreases in other regions were as follows: North Atlantic, 23 percent; South Atlantic, 5 percent; South Central, 2 percent; and East North Central, 1 percent.

The hatch of egg-type chicks during the first 9 months of 1967 totaled 451 million, down 2 percent from the same period last year. The number of egg-type eggs in incubators on October 1 was down 14 percent from October 1 a year earlier.

Poult Production

452

Poult production of all breeds during September 1967 totaled 2,272,000, up 8 percent from the September 1966 hatch of 2,100,000 poult. The hatch of heavy breed poult during September was 1,139,000, up 60 percent from a year earlier. Light breeds totaled 1,133,000, down 18 percent. There were 128,334,000 poult hatched during the period January through September 1967, an increase of 6 percent from the corresponding period of 1966. The number of heavy breed turkey eggs in incubators on October 1, 1967 was up 20 percent from October 1, 1966 while light breed eggs in incubators October 1 were down 17 percent. Total eggs in incubators for all breeds on October 1 were about same as a year earlier.
